

## “Unlocking business potential with intelligent planning”

- ❖ Anaplan is a cloud-based platform that unifies planning across finance, sales, supply chain, and HR for real-time forecasting and analysis.
- ❖ It enhances decision-making and collaboration with AI-driven insights and scenario planning across business functions

### Key Features of Anaplan

- **Unified Planning Platform** – Combines strategic, financial, and operational planning in a single cloud-based solution.
- **AI-Powered Forecasting** – Enhances predictions and recommendations using embedded machine learning and optimization.
- **Collaborative & Connected** – Enables real-time teamwork with contextual workflows and seamless data integration.
- **Scenario & Risk Modelling** – Supports advanced scenario analysis to improve risk management and decision-making.

### nexusEPM Service Offerings

- **Implementation:** End-to-end Anaplan deployment, customization, and integration services.
- **Support:** Ongoing maintenance, performance tuning, and issue resolution for sustainable success.
- **Advisory:** Strategic consulting to align Anaplan with business goals and transform planning processes.

### Implementation

#### Methodology

- ❖ **Discover & Design:** Analyse enterprise planning requirements, current systems, and design Anaplan models and workflows using industry best practices.
- ❖ **Deploy:** Configure, test, and validate Anaplan applications to ensure flexible, scalable, and collaborative planning.
- ❖ **Enable:** Provide end-user training, proactive support, and continuous optimization to maximize adoption and ROI.
